APPENDIX: Placement by Jurisdiction	

Introduction & Overview

The State is responsible for linking children in out-of-home care with placements and services that meet their needs. It is imperative that the State conducts ongoing, unified and comprehensive reviews of the placements and services provided to the children placed in its care. The purpose of the Out-of-Home Placement (OOHP) and Family Preservation Resource Plan (Report) is to document the State's capacity for and utilization of out-of-home placements, analyze the costs associated with out-of-home placements, facilitate an evaluation of Statewide family preservation programs, and identify areas of need across Maryland. The Report fulfills the requirement, pursuant to the Maryland Annotated Code, Human Services Article, §8-703, to annually produce a State Resource Plan "in order to enhance access to services provided by RCCPs [(Residential Child Care Programs)]" and the 2014 Joint Chairmen's Report requesting an evaluation of "Maryland's family preservation programs in stemming the flow of children from their homes."

The purpose for the Report is to document what is driving placement decisions in Maryland, identify children's needs in Maryland, and describe how the agencies plan to meet those needs. The Report contains information as reported by the child-serving agencies, including Department of Human Resources (DHR), Department of Health and Mental Hygiene (DHMH), Department of Juvenile Services (DJS) and the Maryland State Department of Education (MSDE). In the Report, these agencies summarize notable details about their out-of-home placements, based on common data elements, and may elaborate on other data presented in the Addendum of each agency's section.

In Maryland, children enter out-of-home care for a variety of reasons and under a number of circumstances. Children may be placed in the care and custody of the State when they are determined to be a Child In Need of Assistance (CINA), a Child In Need of Supervision (CINS), or Delinquent. Children can also enter placement through a Voluntary Placement Agreement (VPA) under which a parent voluntarily places a child in the care of the State. This most often occurs when a child is unable to access funding for needed treatment through any other avenue. The State child-serving agencies and administrations responsible for placing children in out-of-home placements are DHR; DJS; and DHMH, including the Developmental Disabilities Administration (DDA) and the Behavioral Health Administration [which recently combined the former Alcohol and Drug Abuse Administration (ADAA) and Mental Hygiene Administration (MHA)]. Although MSDE funds out-of-home placements made by the Local School Systems (LSS), MSDE is not a placing agency and does not place children out-of-home. Children whose placements are funded by MSDE, either in whole or in part, will be discussed in this Report as well as children placed by other agencies and administrations. These agencies and administrations may fund the placements, or the placements may be funded by Medical Assistance (MA), which is administered through DHMH. Placements may also be co-funded by several State agencies.

Each of these child-placing and funding agencies and administrations operates differently at the local level. DHMH (ADAA and MHA), DHR, and MSDE serve children and families through their

24 local counterparts within each of the State's local jurisdictions - the local Department of Social Services (LDSS), the local Core Service Agencies (CSAs)¹, the local Substance Abuse Councils, and the LSS. DJS and DDA have regional offices, which, in turn, have local offices. For administrative purposes, DJS has six designated regions and DDA has four.

These regions are:

DJS

- Baltimore City
- Central Region (Baltimore, Carroll, Harford, and Howard Counties)
- Metro Region (Montgomery and Prince George's Counties)
- Eastern Shore Region (Caroline, Cecil, Dorchester, Kent, Queen Anne's, Somerset, Talbot, Wicomico, and Worcester Counties)
- Southern Region (Anne Arundel, Calvert, Charles, and St. Mary's Counties)
- Western Region (Allegany, Frederick, Garrett, and Washington Counties)

DDA

- Central Region (Baltimore City, and Anne Arundel, Baltimore, Harford and Howard Counties)
- Eastern Shore Region (Caroline, Cecil, Dorchester, Kent, Queen Anne's, Somerset, Talbot, Wicomico, and Worcester Counties)
- Southern Region (Calvert, Charles, St. Mary's, Montgomery, and Prince George's Counties)
- Western Region (Allegany, Carroll, Frederick, Garrett, and Washington Counties)

Data Collection Methodology, Definitions, and Considerations

The data in this Report is aggregate data submitted by each agency for the fiscal years, and the one-day census for each fiscal year. Each agency was given a data request guide along with data collection templates for data reporting and clarification of the information request. GOC also worked individually with each agency to ensure a thorough understanding of reporting requirements and identification of each agency's unique placement process and data collection methods.

¹ One Core Service Agency located on the Eastern Shore serves five local jurisdictions.

Methodology

Each child-serving agency was requested to provide aggregate data using specific templates for children in placement and associated costs for the last three fiscal years. The following information describes the parameters of the requested data:

Reporting Period

This Report features tables and graphs derived from two data sources – “full fiscal year” data and “one-day census” data. This Report differentiates tables using fiscal year data with a shaded background, and graphs using the one-day census with a white, or blank, background.

These are the definitions for each data reporting period:

- *“Full Fiscal Year”* - All placements during the fiscal year including carryover placements from the prior fiscal year(s). The fiscal year periods are as follows:

FY2010: July 1, 2009 through June 30, 2010

FY2011: July 1, 2010 through June 30, 2011

FY2012: July 1, 2011 through June 30, 2012

FY2013: July 1, 2012 through June 30, 2013

FY2014: July 1, 2013 through June 30, 2014

- *“One-Day Census”* - The one-day count date used for each fiscal year is as follows:

FY2010: January 31, 2010

FY2011: January 31, 2011

FY2012: January 31, 2012

FY2013: January 31, 2013

FY2014: January 31, 2014

Age Group

This Report classifies placement for children through their 21st birthday (*i.e.*, to age 20.999) as of the date of admission for new placements, and as of July 1st of the fiscal year for carryover placements. There are two exceptions to this construct: placements that are funded by MSDE include children who are served through the academic year of their 21st birthday, and ADAA placements that end at the child’s 18th birthday when they are transitioned to the adult system.

Race

Any child who is characterized in case records as identifying with more than one race is included in the “Bi-Racial/Multiple Race” category. Children who identify as Hispanic are included in the “Other” category if they did not identify as any race but identified as being Hispanic in ethnicity.

Definitions

- *“Bed-Day”* - A unit of measurement that refers to a single day in which one child is provided placement in any out-of-home placement.
- *“Children/Youth”* - The term “youth” is used interchangeably with the term “child” but is often used to describe older adolescents or individuals age 18 or older, and is typically used by agencies that primarily serve these populations. A child is anyone under age 18, but most agencies will serve individuals until their 21st birthday.
- *“One-Day Census”* - The measurement of total population on one day out of the year. January 31st is consistently used because it is about halfway through the State fiscal year. This measurement is used to gauge the total serving capacity of placements on a comparable, specific, single day.
- *“Population Flow”* - The total number of placements at the start of the fiscal year, new admissions within the fiscal year, discharges within the fiscal year, and placements at the end of the fiscal year.
- *“Rate of New Placement Settings”* - The rate of new admissions into a category of out-of-home placement per 1,000 children (aged 0 to 18) within a given geographic population.
- *“Total Served”* – The number of placements at the start of the fiscal year in addition to the number of new placements added during the fiscal year. The placements are counted, and not the number of children, because one child can be placed in more than one category, jurisdiction, or agency in one year. The “total served” encompasses children who may have been placed since the previous year, or before.

Considerations

The FY2014 Report uses a variety of measurements to capture placement dynamics among diverse services, agencies, and jurisdictions. Among those measurements are cost per bed-day, one-day census, population flow, and rate of entry per jurisdiction. These measurements provide a uniform method, based on substantive information, for comparing diverse placements and agencies. Where the data serves as only a partial representation of placement dynamics, or if a particular agency does not calculate data as prescribed by the measurement, the authors of this Report have endeavored to supplement the data and tables with additional information.

Other considerations should be noted as follows:

- **Cost per Bed-Day:** Not all agencies calculate bed-days.
- **One-Day Census:** The totals are derived from a count of all children in placement on one day of the year. This is not the total number of children served in placement during the course of the year. This number is a snapshot in time that demonstrates how many children may be in placement at any given time.

- **Population Flow:** The population flow reflects changes in placements throughout the year. A change is considered to be a discharge or enrollment of any child in a new placement category (*e.g.*, from family home setting to community-based placement), a new jurisdiction (*e.g.*, a transfer from one county to another), or a new placing agency (*e.g.*, a change in custodial responsibility). The population flow counts *placements*, and not *children*, because one child can be placed in more than one category, jurisdiction, or agency in one year. A child may enter a new placement more than once in one year for a number of reasons, including because the child needs to be placed in a more restrictive placement for his or her needs, or because the child has progressed in meeting treatment goals and can be moved to a less restrictive environment. Placement numbers coming from population flow will be higher than the number of children who are actually placed.
- **Rate of New Placement Settings per Jurisdiction:** This shows the trend of children being placed within a jurisdiction. For jurisdictions in which few children are placed each year, the difference of one or two children being placed can exaggerate changes in the trend. The rate of new placement settings comes from the number of new placements (or starts) during the fiscal year, so this number counts placements and not children (see “Population Flow” above).
- **DJS Out-of-Home Placement Information:** The data reported includes only youth who are placed in either in-State or out-of-State committed programs. All committed youth are adjudicated delinquent and committed to the custody of DJS by the juvenile court. A continuum of out-of-home placement options is available for these youth, ranging from placement in a foster care setting to placement in a secure confinement facility. The cost data reported under each section also reflects only youth in committed placements. “Non-committed” DJS youth, who are not adjudicated delinquent or placed by the juvenile court, are not represented in the placement totals and placement costs in this Report.
- **DJS Hospitalization Costs:** When a DJS-committed child is admitted to a psychiatric hospital, DJS pays only the educational portion of the costs, and other entities, such as Medical Assistance or private insurance, pay the remaining costs. This Report includes only educational costs, rather than the total costs.²
- **Residential Treatment Center Placements:** These placements are reported by DJS and included in the MHA Residential Treatment Center placements. Because the population flow totals cannot be disaggregated, some placements may be double-counted within the Residential Treatment Center category.
- **MHA Cost Data:** MHA services that are billed through Medicaid can be processed up to one year following the provision of the service, which is the time when MHA receives notice of an expenditure. Costs that were incurred by MHA from the previous fiscal year but that are billed in the current fiscal year are reconciled in the

² Prior to 2013, this Report included total costs.

following year. Because of this, current fiscal year costs may be slightly understated and prior fiscal year costs may be higher than reported in the previous year.

- **DHR Cost Data:** Services that DHR bills through Medicaid for its placements are not reflected in the DHR cost tables and primarily include Residential Treatment Center placements. Instead, these costs appear in the MHA section. Additionally, DHR costs are reported by main placement category, but not by placement subcategory (see descriptions below).
- **Unknown and Not Available Placements:** An “Unknown” or “Not Available” placement category is used to describe children who have run away or who cannot be identified in a placement category because an agency’s records have not been updated. Differences among the placement subcategories are further explained in each of the placement category descriptions.

Report Overview

This OOHP Report is presented by the Children’s Cabinet. The Children’s Cabinet coordinates the child and family focused service delivery system by emphasizing prevention, early intervention, and community-based services for all children and families. The Children’s Cabinet includes the Secretaries from the Departments of Budget and Management, Disabilities, Health and Mental Hygiene, Human Resources, and Juvenile Services, as well as the State Superintendent of Schools for the Maryland State Department of Education. The Executive Director of the Governor’s Office for Children chairs the Children’s Cabinet.

The FY2014 Report includes a Statewide summary of all out-of-home placements, five-year trend analyses and recommendations for out-of-home placements by the State agencies that place children or fund children’s placements, a description of placements at Maryland’s School for the Blind and School for the Deaf, and a discussion of Family Preservation Services.

The Children’s Cabinet’s objective for the Report is to provide an accurate and precise analysis of each agency’s placement trends and future resource development priorities. The Children’s Cabinet continues to strengthen, develop, and adopt strategies to serve children in their homes and communities. This Report supports a more comprehensive understanding of the needs of children who require out-of-home placement. The Children’s Cabinet agencies seek to improve the tracking and monitoring of placements, and identify meaningful ways to measure progress. These efforts assist the State and local jurisdictions in the planning of effective services and utilizing funding in the most effective and efficient manner.

Placement Categories

There are four categories of out-of-home placement for children in the State of Maryland. These categories fall on a continuum, beginning with the least restrictive setting (Family Home) and moving toward more highly-structured and treatment-oriented setting (Hospitalization).

Family Home	Non-Community-Based
Adoptive Care Foster Care Formal Relative (Kinship) Care Restricted Relative (Kinship) Care Treatment Foster Care Living-Arrangement – Family Home	Diagnostic Evaluation Treatment Programs Non-Secure/Non-Residential Treatment Center Residential Educational Facilities Residential Treatment Centers Substance Abuse and Addiction Programs Living Arrangement – Non-Community-Based
Community-Based	Hospitalization
Independent Living Programs Residential Child Care Programs Community Supported Living Arrangement Living Arrangement – Community-Based	In-Patient Private Psychiatric Hospitalization

Table 1

While there is a range of out-of-home placement types, only DHR and DJS place children in all the placement categories. DHMH and its administrations (MHA, DDA, and ADAA) place children in only one category each. MSDE only funds placements and does not directly place children. Table 2 illustrates overlaps among agencies in placement subcategories, and the subcategories specific to a particular agency.

State Agency Placement Categories: Placement Totals on 1/31/2014																			
	Family Home Placement						Community-Based Placement				Non-Community-Based Placement							Hospitalization Placement	
Placing Agency	Adoptive Care	Foster Care	Formal Relative (Kinship) Care	Restricted Relative (Kinship) Care	Treatment Foster Care	Living Arrangement - Family Home	Independent Living Programs	Residential Child Care Program	Community Supported Living Arrangement	Living Arrangement - Community-Based	Diagnostic Evaluation Treatment Program	Juvenile Detention and Commitment Centers	Non-Secure/Non-RTC	Residential Educational Facilities	Residential Treatment Centers	Substance Abuse and Addiction Programs	Living Arrangement - Non-Community Based	In-Patient Private	Psychiatric Hospitalization
DHR	32	1128	761	326	1541	236	188	611		43					183		89	9	8

MSDE														47					
MHA															418				
DDA								17	68										
ADAA																196			

Table 2

Organization of the Report

Out-of Home Placement Summaries

The out-of-home placement portion of the FY2014 Report consists of summaries from each of the child-placing and funding agencies, as well as a Statewide summary of all placements in Maryland. Each section utilizes the same data metrics to aid comparison between the varying populations served by the agencies, organized under the following headings:

Summary

An overview of the number of children in placement during each year's one-day census and the total number of placements at the beginning of the fiscal year, in addition to the number of placements added during the fiscal year, the population flow during the last five fiscal years, rate of placement by jurisdiction based on one-day census data, total costs, and costs per bed-day.

Recommendations

The agency's or administration's strategies to: address gaps in services, serve children in their home jurisdictions whenever possible, and reduce the length of stay in out-of-home placement programs while increasing the rates of positive discharges to less-restrictive settings or permanent homes.

Addendum

This section includes data on the demographics of children in placement (age, gender, race), out-of-State placement trends, as well as out-of-State demographics for agencies with 10 or more out-of-State placements. The section also includes placement subcategory total costs and costs per bed-day for agencies with more than one placement category (DHR and DJS).

Maryland School for the Deaf and Blind

A brief description of the number of students enrolled and costs (residential and educational) associated with the two schools.

Family Preservation Services

A summary of the outcomes achieved by families participating in Family Preservation Services to prevent the out-of-home placement of children involved with the services.

Appendix: Placement by Jurisdiction

The number of children from each jurisdiction in Maryland who were in out-of-home placements on January 31, 2014 and where they were placed, by out-of-home placement subcategory.

Statewide Summary

The Maryland regulations addressing DHR's out-of-home placement program (COMAR 07.02.11) set forth the requirements of the program to reduce the rate at which children enter and re-enter out-of-home placements; reduce the median length of stay in out-of-home placements; minimize the number of placement changes within 24 months of entering out-of-home placements; increase the percentage of reunifications, guardianships, and adoptions; and decrease the number of children in out-of-home placements.

Statewide Placement Trends								
Category	1/31/2009	1/31/2010	1/31/2011	1/31/2012	1/31/2013	1/31/2014	Average Change	Last Year Change
Community-Based Residential Placement	2,035	1,718	1,514	1,465	1,335	1,161	-10.5%	-13.0%
Family Home Settings	6,755	6,490	5,840	5,359	4,619	4,114	-9.4%	-10.9%
Hospitalization	29	31	43	18	31	25	8.1%	-19.4%
Non-Community Based Residential Placement	1,704	1,686	1,646	1,531	1,514	1,482	-2.7%	-2.1%
Placement Category Not Available	251	435	336	302	324	322	9.4%	-0.6%
All Categories	10,774	10,360	9,379	8,675	7,823	7,104	-8.0%	-9.2%

Table 3

The number of children in out-of-home placements has been steadily decreasing since FY2009. In the last fiscal year, the number decreased by 719.³ The most significant decrease has been in the Community-Based Placement category, with a decrease of 17.9% from last fiscal year. It is estimated that nearly 8,000 Maryland children are in out-of-home placements on any given day.

³The number of non-community-based residential placements is higher than actual placements because DJS Residential Treatment Center placements (included in the number of non-community-based residential placements) are reported by both DJS and MHA. DJS Residential Treatment Center placements are included in Table 60. The numbers are unchanged in Table 3 to ensure consistency between the data based on the Statewide one-day census totals, which are not disaggregated by placement subcategory.

All Agencies Total Served								
Category	2009	2010	2011	2012	2013	2014	Average Change	Last Year Change
Family Home	15,306	15,720	14,772	14,351	12,682	11,015	-6.2%	-13.1%
Community-Based	5,370	4,544	4,161	3,935	3,563	2,925	-11.3%	-17.9%
Non-Community Based	6,637	6,992	6,154	6,115	5,865	5,737	-2.7%	-2.2%
Hospitalization	326	307	292	306	393	337	1.7%	-14.2%
Not Available	1,057	572	887	877	850	832	0.6%	-2.1%
Total	28,696	28,135	26,266	25,584	23,353	20,846	-6.1%	-10.7%

Table 4

The total number of out-of-home placements each fiscal year has decreased, as well, by more than 8,000 in the last five fiscal years. As shown in Table 4, the number of Total Served comes from the number of children in out-of-home placements at the start of the fiscal year and all the new out-of-home placements added until the end of the fiscal year.

All Agencies Placement Population Flow (Placements, Not Children)					
State Fiscal Year	Placements at Start of FY	Starts in FY (New Placements)	Total Served	Ends in FY (Placement Exits)	Placements at End of FY
2010	10,499	17,636	28,135	17,972	10,163
2011	9,635	16,631	26,266	16,871	9,395
2012	9,060	16,524	25,584	17,170	8,414
2013	8,278	15,075	23,353	15,747	7,606
2014	7,337	12,983	20,320	13,562	6,758
Three-Year Change	-23.9%	-21.9%	-22.6%	-19.6%	-28.1%
Average Yearly Change	-8.5%	-6.7%	-7.8%	-6.1%	-9.7%
Recent Year Change	-11.4%	-13.9%	-13.0%	-13.9%	-11.1%

Table 5

The rate of new out-of-home placement has also decreased (Table 6). FY2014 had a less than average rate of new out-of-home placement in the last four fiscal years, with 9.8 per 1,000 in the population of children in Maryland. Fluctuations in the rates can be common in jurisdictions with low populations, but many jurisdictions had significant decreases. New out-of-home placement indicates children initially being placed or being moved from one placement to another. Placement moves may occur when a child is in need of more intensive services or when a child has met placement goals and enters a less restrictive setting.

All Agencies Rate of New Placement Setting By Jurisdiction								
Jurisdiction	2010	2011	2012	2013	2014	Three Year Change	Average Change	Last Year Change
Allegany	13.9	14.3	17.6	19.7	17.4	22%	7%	-12%
Anne Arundel	5.5	4.8	6.1	6.5	5.6	17%	2%	-14%
Baltimore	10.3	9.1	9.2	8.5	7.3	-20%	-8%	-14%
Baltimore City	44.7	42.7	50.7	43	36.4	-15%	-4%	-15%
Calvert	9.0	9.5	8.5	10.5	9.1	-4%	1%	-13%
Caroline	12.7	14.0	13.1	10.1	11.4	-19%	-2%	13%
Carroll	5.3	6.2	7.6	6.4	5.5	-11%	2%	-14%
Cecil	13.0	13.2	15.3	16.1	17.9	36%	8%	11%
Charles	8.1	7.6	7.8	7.4	7.8	3%	-1%	5%
Dorchester	19.5	12.1	11.9	17	11.2	-7%	-8%	-34%
Frederick	8.4	6.9	8.1	7.3	6.3	-9%	-6%	-14%
Garrett	22.0	15.1	24.8	21.1	17.1	13%	0%	-19%
Harford	8.1	8.1	9.8	9.3	9.2	14%	4%	-1%
Howard	2.9	2.9	2.9	3	2.9	0%	0%	-3%
Kent	11.3	9.5	7.7	6.7	8.1	-15%	-7%	21%
Montgomery	5.6	5.1	4.9	4.9	4.2	-18%	-7%	-14%
Prince George's	5.9	5.7	6.9	6.9	6.3	11%	2%	-9%
Queen Anne's	8.5	6.6	7.6	7.6	2.8	-58%	-18%	-63%
Somerset	17.1	14.7	24.3	19.4	18.2	24%	6%	-6%
St. Mary's	8.2	11.5	10.2	8.3	9.1	-21%	5%	10%

Washington	13.1	13.6	15.1	13	11.1	-18%	-3%	-15%
Wicomico	10.6	10.6	11.8	11.3	10.2	-4%	-1%	-10%
Worcester	14.8	12.3	10.4	8.7	10.5	-15%	-7%	21%
Total	11.6	11.0	12.3	11.2	9.9	-10%	-3%	-12%

Table 6

Another of Maryland's goals for out-of-home placement is for children to remain close to their homes so they can preserve their family, social, educational, and cultural connections during the period of out-of-home placement. This is not always possible due to the unavailability of resources to suit the child's needs in that jurisdiction or because Kinship and Family Foster Care is available away from the child's home. At least half of the children in out-of-home placement in 10 of Maryland's 24 jurisdictions were placed in their home jurisdiction. Of all the children placed in Maryland, Baltimore City is the location for 36.4% of out-of-home placements, followed by Somerset County with 18.2% of all out-of-home placements in Maryland.

Statewide Placement By Jurisdiction																												
	Jurisdiction Where Children Were Placed

Table 8

Placement costs have been driven down each year since FY2009, with a total reduction of more than \$205 million since that time. This is mostly due to the decrease in the number of children entering out-of-home placements.

Category	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	Average Change	Last Year Change

Table 9

Statewide Recommendations

Maryland's State child and family-serving agencies provide a continuum of care to meet an array of needs along a wide spectrum. The purpose of the State Resource Plan is to ensure that the State is doing the best it can to build a multifaceted network that can strengthen the lives of every child in need in Maryland. In the remainder of this Report, State agencies will describe the means by which they meet children's needs and the challenges they face in helping them. The following is a summary of the State agencies' recommendations to improve the efficiency and effectiveness of the State network. Please note that the Interagency Strategic Plan⁴ may also be consulted as a resource for in-depth discussion of issues surrounding out of home placement and for further recommendations:

Agency	Recommendations
DHR	<ul style="list-style-type: none">• Expand intensive family preservation and post-permanency services.• Create a trauma-informed system that uses standardized assessments to identify services and supports for children and families to prevent out-of-home care and re-entries into out-of-home care as well as to improve well-being.• Support programs such as <i>Family Connections</i>, <i>Homebuilders</i>, <i>SafeCare</i>, and <i>Functional Family Therapy</i> to promote family preservation - multi-faceted, community-based programs that work with families experiencing difficulty in meeting the basic needs of their children and at-risk for child emotional and/or physical neglect.
DJS	<ul style="list-style-type: none">• Maintain the Continuum of Care statute to ensure that DJS continues to have the ability to quickly move youth as necessary from committed placements that are not working out, without need for further court action.• Support DJS capital projects to ensure that sufficient in-State secure slots are available for high-risk committed youth.
DDA	<ul style="list-style-type: none">• Identify youth early before they age out of support systems and transition planning.• Continue to work with other administrations and community resources to allow children to remain in their homes.
MSDE	<ul style="list-style-type: none">• Continue working with Maryland providers of services to children with autism through the Autism Waiver.• Continue to support local schools systems to enhance services and supports for students to remain in their community schools.• Support cross-agency collaboration to ensure the development of community-based and residential programs to meet the needs of students typically placed out-of-State and to facilitate the return of these students to Maryland programs and schools.
MHA	Continue efforts to minimize out-of-State placements through the implementation of a 1915(i) Medicaid State Plan amendment providing intensive wraparound services. The feasibility of in-State Residential Treatment Centers offering specialized services such as treatment for fire-setting and sexually offensive behavior should continue to be assessed.

⁴The Interagency Strategic Plan is a collaborative effort by the Maryland Children's Cabinet in partnership with families, communities, and providers to improve the child-family serving delivery system to better anticipate and respond to the needs of youth and families. Department of Human Resources (DHR) Summary

DHR prioritizes child safety, permanency, and well-being for children and families. DHR is committed to ensuring that children and youth are kept with their families whenever safe and possible. This is one of the central principles of the Place Matters and Family-Centered Practice initiatives. Since the beginning of Place Matters, the number of children in DHR out-of-home (OOH) care has decreased 48% (10,330 in July 2007 to 5,339 in June 2014).⁵

Maryland's Family-Centered Practice model is a fundamental component of DHR's and the local Departments of Social Services' work with families. Workers develop individualized service plans based on comprehensive assessments of the families' strengths and needs, with goals of increasing families' capacities to protect their children. Family Involvement Meetings (FIMs) are also used to engage families in service plan development, especially when safety/risk issues are severe enough that a child may be removed from the home. When OOH placement is necessary, the first choice is always a family home (family foster home or relative placement).

FIMs and other Family-Centered Practice approaches strengthen families by bringing additional resources to families, and helping children stay with their families of origin or relatives. These efforts are designed to reduce risk factors which lead to abuse and neglect, increase safety for children, and avoid OOH placement or reduce time in care.

Most children—an average of 75% over the last six years—in DHR OOH care are in family homes (Table 23). The Family-Centered Practices of child and family inclusion in case planning and decision-making have been crucial in achieving these goals.

DHR 2014 Highlights

The number of children in DHR OOH care is at its lowest point in at least the past 25 years, with a 39% reduction since 2009 and a 48% reduction since 2007 both as an absolute number and as a proportion of children in placement.⁶ In 2014, 73% of children/youth in DHR OOH care were in family homes, with another 15% in community-based placements (Table 23).

Table 23

Across all 24 Maryland jurisdictions, 54% of all children in DHR OOH care are placed in their home jurisdiction. These placements are in alignment with Place Matters and Family-Centered Practice values, which focus on the placement of children close to their families and communities when safe and possible, in order to maintain relationships and facilitate frequent family visitation. Other children may be placed in adjacent jurisdictions or even out of State, which may be closer to a child's home than a location within the same jurisdiction or state. Additionally, relative placements even out of the jurisdiction (or out of State) may be preferable to non-relative placements within the jurisdiction.

Nearly half (46%) of children in DHR OOH care comes from Baltimore City. Another 27% come from Baltimore County, Montgomery, and Prince George's Counties; each of these jurisdictions placed more than 60% of children within their own County as of January 31, 2014. Baltimore City had 48% of its children in care placed within its jurisdiction. Each other local department/jurisdiction had less than 4% each of the total DHR OOH population.

Table 26

DHR Demographics

As of January 31, 2014, 25% of children in DHR OOH care were age 5 and younger; 16% were ages 6 to 11; 33% were ages 12 to 17; and 26% were age 18 and older. These percentages are similar to last year's data. Nearly 60% of youth in DHR OOH care are over the age of 11; this has significant implications for placement needs and challenges. Foster parenting skills, therapeutic treatments, and other service needs of older children and youth are different than those of infants, toddlers, and young children.

Although there is still a significant disparity, the percentages of Black/African-American children in DHR OOH care have been decreasing over the past several years. The percentage of White children also has decreased, but by a smaller percentage. In 2009, 72% of children in DHR OOH care were Black/African-American; in 2014, the percentage fell to 63%. In 2009, 21% of children in DHR OOH care were White; in 2014, 28% were White. Gender remains nearly evenly split between males and females.

Table 29

DHR Placement Subcategory Trends

Placement subcategory tables include data on new entries into DHR OOH care, placement changes among children already in DHR OOH care, and children exiting DHR OOH care. Placement changes are counted as both “entries” and “exits.” The Total Served, Entries, and Exits numbers are therefore duplicate counts of children in care, representing the number of placements, not children (a child may have multiple placements within a fiscal year, and each placement is counted; therefore a child may be counted multiple times.).

These placement changes are often appropriate and to a lesser level of “restrictiveness” – for example, a child may move from a group home to a family foster home and then to trial home visit with his/her biological parents, in preparation for reunification. Or, a child may need a short-term hospitalization and then be placed into a group home or foster home.

As the total DHR OOH care population has decreased since July 2007, the numbers of family home and community-based placements have correspondingly decreased. There was a total DHR OOH population decrease of 39% from 2009 to 2014; there was a corresponding 40% decrease in family home placements and a higher 49% decrease in community-based placements. The larger decrease in community-based placements is a result of the Place Matters focus on family home placements for children, and the idea that every child deserves a family. There has been a 19% decrease in both hospitalizations and non-community based placements since 2009.

Family homes (for DHR) are defined as placements in a family setting, and include placement categories of:

- Relative/kinship care (paid/restricted/relative and unpaid/formal kinship care);
- Living arrangements (primarily Trial Home Visits with family of origin, but also including own home/apartment);
- Adoptive care (pre-finalized adoptive homes);
- Foster care (emergency, intermediate, regular foster care, and respite care); and
- Treatment foster care (private and public).

Within the family home subcategory, the greatest decreases are seen in adoptive and formal relative (kinship) and restrictive relative (kinship) care placements. Meanwhile, although the raw numbers of foster care, treatment foster care, and living arrangement/family homes (trial home visit or own home/apartment) have decreased, the proportion of children in these placements (out of all DHR placements) has been increasing.

Care must be taken when interpreting Family Home data, if used to analyze private provider usage. Thirty-three percent (33%) of Family Home placements are specific to individual children – meaning, they are relative homes: Formal Relative (Kinship) Care, Restrictive Relative (Kinship Care), or Living Arrangement – Family Home (primarily trial home visits). Meanwhile, another 1% are adoptive homes, 38% are Treatment Foster Care placements (the majority of which are private providers), and 28% are regular foster care which typically are public homes (*i.e.*, licensed by the local Department of Social Services).

Community-based placements constitute DHR's second-most used placement type; an average of 16% of all DHR children/youth are in community-based placements. For DHR, this includes: college, JobCorps, independent living residential programs, and residential child care programs (group homes).

Twenty-six percent of all children/youth in DHR care as of January 31, 2014 were above age 17; college, JobCorps, and independent living placements are age-appropriate for this population, and therefore least-restrictive. Fifty-eight percent of all youth in DHR community-based placements are age 18 and older.

Youth age 18 and over have a choice to remain in DHR OOH care or not; they may choose to remain in care until age 21, but are not legally required to do so. Youth are eligible for independent living programs at age 16.

Less than 1% of children in DHR OOH care are placed in the State's most restrictive placements (hospitalizations), while an average of 4% are in non-community-based placements (Residential Treatment Centers, Correctional Institutions, or Secure Detention). Placements of children/youth in these settings are driven by severe mental health and medical needs, and/or

the juvenile/adult criminal justice system, although past abuse and trauma may contribute to individual children's mental health issues and/or criminal acting-out behaviors.

There has also been an average of 5% of child records with incomplete placement information – this includes children on runaway status, as well as children whose placement data has not been fully entered into MD CHESSIE (DHR's client information system).

DHR Out-of-State (OOS)

Only 3% of all DHR OOH placements on January 31, 2014 were out-of-State; this is consistent with the percentage in prior years. Of those, the largest number was family home placements, and 66% of children in family homes were placed with family members, adoptive homes, or their own homes. Only one percent of all community-based placements were out-of-State, primarily residential child care (group home) placements but also independent living, college, and JobCorps placements. Residential treatment centers, hospitalizations, and detention and correctional institutions were other out-of-State placements.

DHR Costs

DHR funds only two categories of placements - family home and community-based placements, although not all of these placements require funding. Family foster home placements of trial home placement and formal kinship care placements do not require funding, nor do some types of community-based placements. Hospitalizations are paid for by Medical Assistance, as is the residential portion of residential treatment center placements (non-community based); the other non-community based placements of secure detention or correctional institution are mandated for and paid for by the criminal justice system for youth detained, charged, adjudicated, and/or found guilty of criminal or delinquent behavior.

Over the past five fiscal years, DHR's residential costs have continued to decrease, with an average annual decrease of 8%, and an overall decrease of 35% since 2008. In FY2009, the costs were just over \$300M. In FY2013, residential costs were slightly under \$200M, for the first time in several years; in FY 2014, the costs decreased to just under \$195M.

DHR Cost Trends									
Cost Type	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	Average Change	Last Year Change	2009 - 2014 Change

% Educational	2%	3%	3%	3%	2%	3%			
% Administrative	22%	24%	25%	28%	27%	27%			

Table 30

Total costs, which include residential as well as education and administrative costs, also continue to decrease. The average annual decrease of total costs is 7%, with an overall decrease of 30% since 2009, to \$278M in FY 2014. Education costs, however, have increased from \$6M in FY 2009 to \$8M in FY 2014, while administrative costs have decreased 14% from \$87M in FY 2009 to \$75M in FY 2014.⁷

DHR All Categories Cost Per Bed-Day Trends								
Category	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	Average Change	Last Year Change
Community-Based Residential Placement	\$281	\$250	\$229	\$233	\$244	\$278	0%	14%
Family Home Settings	\$86	\$92	\$88	\$93	\$99	\$111	5%	12%
Hospitalization	NA	NA	NA	NA	NA	NA	NA	NA
Non-Community Based Residential Placement	NA	NA	NA	NA	NA	NA	NA	NA
Not Available	NA	NA	NA	NA	NA	NA	NA	NA
All Categories	\$135	\$127	\$118	\$124	\$132	\$146	2%	11%

Table 31

Community-based placements continue to have higher per-bed-day costs than family home placements, with a FY2014 average bed-day cost of \$278, compared to \$111 family home placements (only paid placements were included in these averages). Despite the higher per-bed-day cost, however, community-based placements constitute 40% of all DHR residential placements costs, while family homes constitute 60%; this is due to the larger number of family home placements.

⁷ Education and administrative costs were not reported in the last three JCR Reports.

DHR Recommendations

The primary goal of DHR is to prevent maltreatment and out-of-home placement of children and youth—when placement is necessary to protect a child’s safety, reunification is the preferred goal; therefore, services that can support these goals are the priority of DHR.

DHR has identified the following critical areas for increased services:

- Services to children ages 0 to 8 and at risk for out-of-home placement;
- Services to youth ages 14 to 17 and at risk for out-of-home placement;
- Older youth in out-of-home care;
- Children/youth exiting out-of-home care and at risk for reentry to out-of-home care; and
- A need to strengthen all services to build a system of trauma-informed care.

In FY 2013, children 0-8 and 14-17 years old represent 81% of all entries into out-of-home placement;⁸ 26% of children in DHR’s OOH population in FY 2014 were over age 17. Slightly more than 15% of children exiting DHR OOH care re-enter care within 12-months (FY 2013 data).⁹ Trauma affects nearly all children in the child welfare system, as well as many parents and caregivers.

DHR has several current initiatives which address these needs:

1. Award of IV-E Waiver Block Grant – DHR was awarded a 5-year, \$650 million federal demonstration project from the U.S. Department of Health and Human Services that allows Maryland more flexibility in using federal foster care funds to achieve improved safety, permanency and well-being of vulnerable children. This grant allows funds that could previously only be used as reimbursement for out-of-home placement to be used for in-home supports, prevention services, and other services that keep children at home safely. The project includes an extensive planning process and can begin as early as July 1, 2015.
2. Performance-based contracting for residential congregate care providers (RCCs) (or group homes) increases accountability and quality of community-based out of home care.

⁸ *Maryland Department of Human Resources Title IV-E Child Welfare Waiver*, Maryland Department of Human Resources, February 2014,
<http://www.dhr.state.md.us/documents/Data%20and%20Reports/SSA/Maryland%202014%20IV-E%20Waiver%20Application.pdf>.

⁹ *Maryland Department of Human Resources Child and Family Services Plan, 2015 – 2019*, Maryland Department of Human Resources, June 2014.

3. Continuation of Family-Centered Practice and Place Matters initiatives, which focus on child, youth, and family involvement, natural and community supports, and keeping children in their homes and communities whenever safe and possible. Family Involvement Meetings are used to plan services, identify resources, avoid out-of-home placement, and engage the family. Guardianship Assistance Program, Kinship Navigators, and Family Finding are used to avoid out-home-placement and/or help children find permanent homes with relatives.
4. Ready by 21™ is Maryland's initiative to ensure that youth are prepared for the transition into adulthood. Focusing on the five core areas of housing, education, finances, health, and mentoring, Ready by 21 provides a framework and key strategies that are implemented at the local level by the LDSS and their community partners. Ready by 21 is designed to ensure that youth have the necessary skills and resources to integrate back into their homes and communities when they reunify with their families or to be successful if they emancipate from care at age 21.
5. Additional programs such as Youth Matter, Alternative Response, and Tuition Waivers further engage and strengthen youth and families.

DHR is also working to expand additional programs and services, subject to available funding:

1. DHR will expand intensive family preservation and post-permanency service, including both prevention and post-permanency services.
2. DHR proposes to create a trauma-informed system that uses standardized assessments to identify services and supports for children and families to prevent out-of-home care and re-entries into out-of-home care as well as to improve well-being.
3. **Family Connections:** A multi-faceted, community-based evidence-based program that works with families experiencing difficulty in meeting the basic needs of their children and at-risk for child emotional and/or physical neglect.
4. **Homebuilders:** An intensive evidence-based family preservation program that works with the caregivers to provide in-home crisis intervention, counseling, and life skills education over a short-term period.
5. **SafeCare:** An in-home evidence-based parenting model for parents with children ages 0-5 who are at risk for or have a history of child abuse or neglect. SafeCare provides direct skill training with parents using four modules: health, home safety, parent-child/parent-infant interactions, and problem solving and communication.
6. **Functional Family Therapy (FFT):** FFT is an evidence-based therapy designed for 11-18 year-olds with behavioral health problems including conduct and substance abuse problems. FFT improves family relationships by teaching families how to promote the safety of their children, improve communication skills and skills for solving family problems.

Additional considerations:

Based on LDSS and stakeholder feedback through advisory committees and the quality assurance process, and SSA analysis, DHR would prioritize the following within available resources:

- Specialized resources and increased awareness for the child victims of human sex trafficking that DHR serves.
- Foster and adoptive parents for teens, sibling groups, medically fragile children, and Spanish-speaking children.
- Community services for biological families – for those involved in child welfare as well as for those not involved — including mental health, substance abuse, anger management and financial management services.
- Transportation in every jurisdiction – both intra- and inter-jurisdictional public transportation, for both parents and older youth.
- Job training, employment opportunities, and low-cost housing for both older youth and families.
- Specialized and intensive services for medically fragile, developmentally delayed children, and children/youth with severe mental health disorders.
- Substance abuse treatment programs that accept parents and children together.

Table 59

Department of Juvenile Services (DJS) Summary

DJS has in recent years focused on reducing the time youth who have been committed by the juvenile court to out-of-home placement must stay in detention centers prior to placement. Central to these efforts is making sure that placement decisions are made in a timely, structured, and informed manner, and that youth are ultimately placed into programs meeting both security and treatment needs, to confirm a successful placement that does not result in a removal back to detention. At the same time, DJS has worked to ensure that those placement options are available by increasing the number of in-home slots for lower-risk youth and more secure placement options for higher-risk youth. Initiatives include:

More structured risk and needs assessments

Assessment and treatment planning policies have been refined to better capture the specific treatment needs of each youth, and to structure and guide the placement and case-management processes. The Maryland Comprehensive Assessment and Services Planning (MCASP) has been in place since FY2010 to guide case-forwarding and case-management decisions based on structured risk and needs assessments.

Increased capacity and use of in-home evidence-based programs for lower-risk youth

These programs are meant for youth who are at risk of out-of-home placement, but can be kept at home with intensive family-based services. In prior years such youth may have been placed in group homes or other community-based residential programs, due more to family and home issues than to significant risk to public safety. Since these in-home evidence-based programs (including Functional Family Therapy and Multisystemic Therapy) have been available, DJS use of family home settings (mainly Treatment Foster Care), and community-based residential programs (mainly Group Homes and Therapeutic Group Homes) has declined, as lower-risk youth are kept home.

Increased capacity for non-community-based residential programs for higher-risk youth

DJS has in recent years increased capacity to serve higher-risk youth who may have in previous years been either placed in out-of-State non-community-based placements or in Maryland non-secure community-based residential programs - often with unsuccessful outcomes. These secure placements are available at the State-run Victor Cullen Center, the J. DeWeese Carter Center, the Western Maryland Youth Centers, the William Donald Schaefer House, and the privately-run Silver Oak Academy. Thus, the decline in family home setting and community-based residential placements over the past few years can also be attributed to this increase in more secure slots, as higher-risk youth are more appropriately placed. One of the drivers of pending-placement populations has been the youth who had been placed into non-secure programs, only to be sent back to detention from programs that were not equipped to manage behavior.

Legislative changes allowing for rapid administrative transfer of committed youth

Statutory changes passed during the 2012 legislative session give DJS the ability to move youth from placements that are not working out to different committed programs of either equal or higher security without need for a new court hearing. The Continuum of Care statute¹⁰ now allows DJS (through its new Central Review Committee) to review and, as necessary, quickly move such youth to more secure non-community-based residential programs that are better able to meet the security and treatment needs of the youth. This reduces the need for many youth to be sent back to detention pending a court hearing, and can reduce time in detention for youth that have been ejected. Having more programming capacity at the non-community-based residential placement level is key to the success of this initiative.

Restructuring the placement decision process for youth at risk of out-of-home placement

The Multi-disciplinary Assessment Staffing Team (MAST) process - an enriched multi-disciplinary process, intended to develop comprehensive individualized plans for youth who are removed from home, and to match youth with the right programs and services so that youth will be successful - was implemented across the State in FY2014. This process has shown initial success at moving youth more quickly through the placement decision process, thus reducing the time youth spend in detention centers prior to placement.

Streamlining placement process for out-of-State placements

A large portion of secure placement options for committed youth continues to be in out-of-State programs, and the placement process for these youth has often led to long stays in detention for youth requiring secure placement. Youth being placed in out-of-State placements were previously required to be reviewed by the State Coordinating Council (SCC). Following legislation passed in 2011, the SCC has reevaluated and restructured the way it reviews the information on out-of-State placements in accordance with the 2008 Interagency Strategic Plan. The SCC notification form has also been streamlined to ensure that the SCC process does not interfere with placing a youth into the most appropriate placement possible based on individual needs. DJS developed a checklist and tip-sheet for DJS personnel to use which structured and streamlined internal processes. Once it is determined that in-State options have been exhausted, no out-of-State placement for a youth should be delayed due to incorrect or incomplete administrative requirements.

Table 61

DJS Trends in Out-of-Home Placement

Maryland has seen a sharp decline in the number of juvenile cases referred to DJS Intake in recent years. Since FY2009 the number of complaints referred to DJS declined 48%. This reduction in cases coming to the DJS “front door” has slowly rippled through the system in recent years. Detention populations have begun to decline, though at a slower rate than Intakes: down 36% since FY2009. Cases supervised in the community by DJS caseworkers have declined, with probation orders down 48% since FY2009. This declining trend has just begun to be reflected in the committed out-of-home population. Table 62 shows a three-year change in end of Fiscal Year population of 24%. Much of this decline occurred in the final quarter of FY2014. It is too early to tell if this decline will be sustained in FY2015. Declines in committed population, though evenly distributed by gender, are not evenly distributed by race. While the committed population of white youth declined 12.5%, the drop was just 2.9% for youth of color. The Department has recently partnered with the Annie E. Casey Foundation to study the

way youth are committed to out-of-home placements in Maryland, and to better understand how decisions made throughout the juvenile justice system can impact these racial disparities.

A large portion of secure placement options for committed youth continues to be in out-of-State programs. The population of youth placed out of State has also begun to decline in FY2014, averaging under 100 youth for the first time in five years.

Table 65

DJS Recommendations

The Continuum of Care statute should be maintained to ensure that DJS continues to have the ability to quickly move youth as necessary from committed placements that are not working out, without need for further court action. This will permit DJS to continue to leverage current resources and to strengthen the DJS Continuum of Care to best serve youth committed to DJS for treatment and rehabilitation by:

- Eliminating a youth's time in detention when a youth is ejected from a residential placement. Youth do not receive treatment services while awaiting placement in detention.
- Reducing the likelihood a youth will be released from pending placement without the benefit of treatment when s/he remains in pending placement for long periods of time.
- Decreasing the overall length of time the youth stays in committed status with DJS, by allowing DJS to swiftly address treatment concerns and issues without the youth being placed in detention.

The Continuum of Care legislation has a significant impact on DJS operations. The implementation of this legislation has led to a sustained reduction of youth pending placement in detention centers and has improved the youth's ability to receive the required treatment services.

The Legislature should continue to support DJS capital projects to ensure that DJS has access to adequate capacity to serve the diverse needs of the youth that require an out-of-home placement.

DJS is participating on a subcommittee of the Interagency Rate-Setting Committee (IRC) to evaluate the current rate-setting process for residential child care programs. The subcommittee is exploring ways in which the process can: a) allow for flexibility and innovation in order to meet the needs of children placed in out-of-home care; and b) establish a link between the rate and performance-based outcomes of the program and of children served.

Table 89

Developmental Disabilities Administration (DDA) Summary

DDA provides a coordinated service delivery system oriented toward the goal of integrating individuals with intellectual and developmental disabilities into the community. DDA services are provided through a wide array of community-based services delivered primarily through a network of licensed providers. In addition to adults, DDA makes these services available to children residing in out-of-home placements and in their family homes. When children reside in out-of-home placements, they should receive all appropriate entitlement services prior to accessing DDA funds for services. In FY2014, DDA provided funding for out-of-home services to a total of 128 children, a decrease of 14.7% from FY2013.

DDA considers families and caregivers to be the primary supports for children with intellectual and developmental disabilities, and believes they should have an integral role in children's care. DDA recognizes that families and caregivers have unique and varied needs, and may need assistance from both formal and informal networks to provide their children with the support to reach their full potential as they grow up.

Table 90

Table 90 shows a one-day count of DDA's out-of-home placements on January 31st of each year from 2009 through 2014. In FY2014, the one day count of Community-Supported Living Arrangements (CSLA) services decreased by 16.0%, and the one-day count of children receiving DDA Residential Child Care Program (RCCP) services declined by 22.7%. CSLA services are provided for the majority of children (68 of 85 individuals) that DDA serves in out-of-home placements. CSLA services enable individuals to live in their own homes, apartments, family homes, or rental units by providing supervision and other necessary interventions, thus allowing individuals to remain near friends, members of their family, their local areas, and other known supports.

RCCP services are provided by DDA-licensed providers, and include Group Homes and Alternative Living Units. Group Homes are residences owned, leased, or operated by a DDA

licensee that provide specialized residential services to at least 4 but not more than 8 individuals with intellectual and developmental disabilities. Alternative Living Units are residences owned or leased by DDA licensees that provide specialized residential services to no more than 3 individuals with intellectual and developmental disabilities.

Table 92

DDA is committed to individualized, flexible, family-centered, and family-directed services, and whenever possible attempts to place children in their home jurisdiction. If placement in the home jurisdiction cannot occur, DDA collaborates with other agencies such as DHR, MSDE, and the DHMH Behavioral Health Administration (BHA), responsible for the welfare of children through interagency and intra-agency boards, coordinating councils, committees, and task forces at the State and local levels. These collaborations help to ensure that services are coordinated and entities utilize all appropriate resources for the children. In addition, arrangements for co-funding of interagency service plans are made for children who qualify for services through multiple agencies in order to maximize available resources.

Table 93

As indicated in Table 92, the total number of placements at the start of each fiscal year has declined 20.7% over the past three years. The number of new placements in DDA services from FY2013 to FY2014 decreased by 25%. The total number of placements by DDA in out-of-home placements in FY2014 was 128, 14.7% lower than in FY2013. This table shows the number of placements and not the number of children. In some instances, a child will have more than one placement due to hospitalization, reunification, or move to a new setting.

Of the 73 children receiving out-of-home placement services on January 31, 2014, all but two were placed in their local jurisdiction. Jurisdictions with larger percentages of children in out-of-home placements are consistent with the population of those jurisdictions as indicated in Table 93.

DDA Total Cost								
Subcategory	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	Average Change	Last Year Change
Residential Child Care Program	\$2,464,420	\$2,027,781	\$1,848,389	\$3,029,693	\$2,908,846	\$2,272,657	2.3%	-21.9%
Community Supported Living Arrangement (CSLA)	\$3,531,772	\$3,307,332	\$2,823,561	\$2,843,317	\$3,259,484	\$2,823,561	-3.8%	-13.4%
Total	\$5,996,192	\$5,335,113	\$4,671,950	\$5,873,011	\$6,168,330	\$5,096,218	-2.0%	-17.4%

Table 94

While the cost per bed-day for RCCP services dropped slightly in the past year, it is still over four times more costly than providing out-of-home placement services through CSLA. Over the past six years there has been a slight increase in the cost of CSLA services, but it still remains the more cost-effective model for providing services. The total costs of DDA out-of-home placements have dropped by 17.4%. This is influenced by the decrease in the cost per bed-day as well as the number of children in DDA out-of-home placements.

DDA Cost Per Bed Day								
Subcategory	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	Average Change	Last Year Change

Total	\$102	\$103	\$105	\$142	\$142	\$188	14.1%	32.0%

Table 95

DDA Recommendations

The greatest challenge to the DDA system continues to be the identification and support of children between the ages of 18 and 21 who are aging out of other support systems and agencies within the State. It is critical to identify these children early to allow for thorough, effective transition planning. Incompatible data systems between State agencies and confidentiality issues create barriers to the process. Recent efforts to improve communication and collaboration through inter-agency and intra-agency boards, coordinating councils, committee, and task forces at State and local levels have been helpful in identifying some of these children earlier to allow for smoother transition to adult services. DDA and DHR currently have a comprehensive memorandum of understanding that has enabled DDA to improve the planning process for youth transitioning out of the DHR system.

DDA will continue to work with community resources and other State agencies to enable children to remain in their homes. DDA works in conjunction with other State and local agencies to assess the community's capacity to meet the ongoing needs of children with intellectual and developmental disabilities and their families. Ongoing needs may include medical or behavioral services, specialized childcare, respite, and supports for siblings and caregivers.

DDA will continue to explore needs and the development of resources that will allow families to support their children with disabilities in their homes. DDA remains committed to focusing on supporting families.

Behavioral Health Administration (BHA) Summary

Effective July 1, 2014, within DHMH, the Alcohol and Drug Abuse Administration (ADAA) merged with the Mental Hygiene Administration (MHA) to form the Behavioral Health Administration (BHA). To ensure consistency with previous reports, this year's report will consider placement data from ADAA and MHA separately.

Alcohol and Drug Abuse Administration (ADAA)

As of January 1, 2015, virtually all data reporting by substance-related-disorder-treatment providers will go through the Administrative Services Organization (ASO), Value Options. In anticipation of that major changeover, some treatment providers became less than completely compliant with SMART¹¹ reporting requirements. This affects the data reported in the Out-of-Home Placement Report in two ways - incomplete reporting of treatment admissions or entries depresses the one-day totals, while incomplete reporting of discharges or exits from treatment tends to artificially inflate one-day totals. Estimated costs were also affected. With these reporting issues, the reporting and analysis for this year's out-of-home placements was more challenging than usual. Next year, all reporting for DHMH behavioral health will be through Value Options and accuracy and completeness should improve.

Table 109

All MHA non-community placements are funded through Maryland medical assistance, which is a State and federal Medicaid dollar match. “Residential Treatment Centers” is the only placement subcategory utilized by MHA since it is a medical treatment service and, as such, it is the only non-community based placement which is funded by medical assistance.

For clarity in the discussion of MHA data, a residential treatment center may be referred to as an “RTC” or as a “psychiatric residential treatment facility” (PRTF) using federal government nomenclature. Medical assistance is often referred to simply as “MA,” or as “Medicaid” using federal government nomenclature. RTCs provide behavioral health treatment to children and youth with high levels of clinical need requiring intensive residential medical services and which cannot be met in typical community placements.

The yearly trend of one-day counts for the “Residential Treatment Centers” category shows an average decrease of about 4% over the last five years. The data, however, shows two trends. There were average *decreases* of 11.4% from FY2009 to FY 2012 and average *increases* of 6.1% from FY 2012 to FY 2014. The decreases from FY 2009 to FY 2012 are largely the result of the State’s community-based alternative to residential treatment centers put in place through the federal Medicaid process known as a “Section 1915(c) Home and Community-Based Services Waiver.” This was a demonstration waiver of five years duration.

The federal government has specifically encouraged development of alternatives to the standard residential treatment center or “Psychiatric Residential Treatment Facility (PRTF)” in order to promote treatment in the community. The federal government approved Maryland’s “RTC Waiver” proposal in FY2009. Maryland began enrolling children and youth into this

community alternative in FY2010. The number of children and youth enrolled in the “RTC Waiver” was 60 in FY2010, 166 in FY2011, and 210 in FY2012. This represents children and youth who were treated in the community through intensive “wraparound” services instead of a physical RTC setting.

All children who required a residential treatment center level of care were eligible to be considered for “RTC Waiver” treatment in the community, up to the number of individuals specified in the waiver, as long as it had been determined that they could be safely treated in the community with an appropriate plan of care (POC) which included all of the necessary “wraparound” community services.

The 1915(c) Psychiatric Residential Treatment Facility demonstration waiver (“RTC Waiver”) reached its statutory end on September 30, 2012 when it was not reauthorized by the federal government and new enrollments ceased. The number of Maryland children and youth enrolled in the RTC Waiver population of the Care Management Entity gradually declined throughout FY2013 and FY2014 from approximately 130 to zero in early FY2015 (although new enrollments in the RTC Waiver were not permitted, children and youth already enrolled in the RTC Waiver on September 30, 2012 could continue to be served for a maximum of two years, if eligible). DHMH, however, is planning to offer services to a similar population of children and youth through a 1915(i) Medicaid State Plan amendment that will offer targeted case management and community-based services. The State Plan amendment was recently approved by the Centers for Medicare and Medicaid Services with a retroactive start date of October 1, 2014.

Also contributing to a decrease in the numbers of children in residential treatment centers, the average length of stay in the RTC level of care has declined over the past five years. This has been due primarily to an MHA effort to have children move from the RTCs to community treatment as soon as their clinical needs can safely be met at a lower level of care. MHA has accomplished this through both a process of monitoring their progress in the RTC and providing technical assistance in discharge planning.

MHA Total Served								
	2009	2010	2011	2012	2013	2014	Average Change	Last Year Change
Family Home	0	0	0	0	0	0	NA	NA
Community-Based	0	0	0	0	0	0	NA	NA
Non-Community Based	1,127	1,566	924	1,046	863	907	-0.2%	5.1%
Hospitalization	0	0	0	0	0	0	NA	NA
Not Available	0	0	0	0	0	0	NA	NA
Total	1,127	1,566	924	1,046	863	907	-0.2%	5.1%

Table 110

The MHA “Total Served” numbers of children and youth in residential treatment centers declined since FY2009 and FY2010. As with the one-day counts above, this is the result of the State’s community-based alternative to residential treatment centers put in place through the federal Medicaid process known as a “Section 1915(c) Psychiatric Residential Treatment Facilities (PRTF) Waiver.” During these years, larger numbers of Maryland children and youth have been served in community placements with wraparound services.

Note: “MHA Total Served” numbers for FY2012 through FY2014 in Table 110 are based on treatment episodes rather than unduplicated numbers of individuals and, so, likely over-represent the annual numbers of *individuals* served since a few individuals may have had more than one RTC admission and discharge during a fiscal year. Although it is difficult to estimate the precise impact of multiple discharges and readmissions, this may account for a small percentage (<3%) of these numbers.

MHA Placement Population Flow					
State Fiscal Year	Placements at Start of FY	Starts in FY (New Placements)	Total Served	Ends in FY (Placement Exits)	Placements at End of FY
2010	517	1,049	1,566	648	918
2011	435	489	924	430	494
2012	441	605	1,046	650	396
2013	407	456	863	496	367
2014	401	480	881	477	404
Three-Year Change	-7.8%	-1.8%	-4.7%	10.9%	-18.2%
Average Yearly Change	-4.7%	-5.9%	-8.6%	-2.0%	-12.7%
Recent Year Change	-1.5%	5.3%	2.1%	-3.8%	10.1%

Table 111

Table 111 represents the flow of admissions and discharges from the in-State and out-of-State residential treatment centers over the course of the fiscal year. It is based on claims for reimbursement for the residential treatment center level of care. When claims are received can slightly affect the numbers of placements at the ending and start of the fiscal year so they are not exactly equal.

The FY2010 figures in Table 111 are calculated differently from other years; however, it is included here for the sake of consistency with past reports. In FY2011, the method for calculating population flow was changed and has been applied in years FY2011-2014. FY2010 will not be included in future reports.

Total Served data for FY2011 through FY2014 show a 13.2% increase from FY2011 to FY2012, a 17.5% decrease from FY2013 to FY2013, and a 3.7% increase from FY2013 to FY2014. The average change from FY2011 to FY2014 is only -0.2%. A least-squares (Pearson correlation) line fitted to the FY2011 to FY2014 data, however, indicates a trend of moderate reduction in total served over the four years. This is due in part from Maryland’s community-based “RTC waiver” alternative to residential treatment centers in place from FY2009 through 2014, but the data also suggests a trend of reduction in overall RTC placements.

Table 112

Although placement within (or near) a youth's jurisdiction is one factor considered in placing a child in a residential treatment center, the primary determinant is the youth's treatment needs, since some types of treatment services are available in some residential treatment centers and not in others (programming, ages and genders served are not identical across facilities), and whether or not a particular program has a vacancy at the time of referral or anticipates one within a reasonable time frame.

Furthermore, there are 10 RTCs located in five jurisdictions so these are not uniformly distributed throughout the State. Youth from jurisdictions other than these five will necessarily be placed outside his/her jurisdiction. The in-State RTCs are located in Baltimore County (4), Baltimore City (2), Montgomery County (2), Dorchester County (1), and Frederick County (1). Finally, each RTC determines which youth will be admitted, considering programming and vacancy constraints upon admissions.

MHA Non-Community Based Cost Trends								
Subcategory	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	Average Change	Last Year Change
Residential Treatment Centers	\$94,033,805	\$91,629,633	\$72,649,911	\$71,180,664	\$66,348,547	\$67,700,710	-6.0%	2.0%
Total	\$94,033,805	\$91,629,633	\$72,649,911	\$71,180,664	\$66,348,547	\$67,700,710	-6.0%	2.0%

Table 114

As noted earlier, all MHA non-community based placements are in residential treatment centers. The figures in this Table represent the total medical assistance costs for all residential treatment center placements. These costs vary by the number of youth who are placed, by the specific placements since the programs receive different reimbursement, and these program costs themselves also vary year to year. As the number of youth in RTCs and the length of stay in the RTCs have decreased over the past five fiscal years, however, the cost for the treatment of youth in the RTCs has also decreased over the same period of time.

MHA Non-Community Based Cost Per Bed-Day Trends								
Subcategory	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	Average Change	Last Year Change
Residential Treatment Centers	\$377	\$432	\$453	\$460	\$458	\$475	4.8%	3.8%
Total	\$377	\$432	\$453	\$460	\$458	\$475	4.8%	3.8%

Table 115

These figures represent the medical assistance costs for all youth placed by MHA in residential treatment centers divided by the number of bed days (the total number of days in residential treatment for all youth placed in residential treatment centers). These bed-day costs can vary due to utilization of residential treatment centers whose costs which may be higher or lower than average due to different programming. RTC costs overall can vary year to year and have increased slightly over the past four years.

MHA Recommendations

The current capacity of residential treatment centers in Maryland appears adequate to meet the needs of Maryland youth for this level of care for the foreseeable future, based on vacancy rates for the in-State RTCs and plans to serve youth in the community via the 1915(i) State Plan amendment. It would seem desirable to have the Maryland RTCs offer more options for specialized treatment, such as treatment for fire-setting and sexually offensive behavior, especially for youth with low levels of intellectual functioning. At this time, however, it appears unlikely that there would be sufficient numbers of in-State referrals to make financial sense for an in-State RTC to develop such programming.

MHA efforts to minimize the number of Maryland youth in out-of-State placements have been successful and will continue. At the present time, however, it appears likely that for a very small number of Maryland youth with needs for specialized treatment or who are in especially complicated circumstances, an out-of-State placement will continue to be necessary.

Table 119

Maryland State Department of Education (MSDE) Summary

Local School Systems (LSSs) are required to provide a Free and Appropriate Public Education (FAPE) for all students who require special education and related services. Special education and related services for children in residential placements are determined through the Individualized Education Program (IEP) team process. The IEP team, including the parent, determines the services required, the type of program, and identifies the location for the delivery of services. The IEP team is charged with ensuring that the child is demonstrating educational progress in the approved placement and the team may determine at any time that a change in placement is necessary to implement the IEP and to provide a FAPE.

An out-of-home placement only occurs for a student, placed by a LSS, when the team determines that the child requires a residential educational facility. Maryland residential treatment centers are approved for educational purposes as residential educational facilities. The number of students requiring residential settings as a school placement is approximately .0005% of the total population of students with disabilities. The LSSs are experiencing a continued decline in the number of children requiring residential services through the IEP team process. There has been an increase of services at the community level under targeted initiatives such as the Autism Waiver and specific mental health partnerships. As students with severe autism and severe emotional disabilities enter their teen-age and young-adult years, providing educational services for these students may become increasingly challenging because of their age and the exhaustion of community-based services. Older students with residential needs frequently remain in residential schools until they transition to adult services. The LSSs are required to provide special education and related services through the school year in which the child turns 21.

Table 124

MSDE Recommendations

MSDE Division of Special Education/Early Intervention Services (DSE/EIS) has worked directly with Maryland private day and residential education facilities to build in-State capacity for students requiring intensive services. For the school year 2013-2104, an established Maryland provider became active in serving students with autism for residential placements under the Autism Waiver. MSDE provided ongoing support and technical assistance to this provider and others to build capacity and quality programming for students. During the 2014-2015 school year MSDE, DSE/EIS will continue to support local schools systems to enhance services and supports for students to remain in their community schools.

In addition, MSDE, DSE/EIS increased the number of children directly served under the Autism Waiver. This increase in funding capacity increased the number of children with autism whose needs are supported in their homes and communities.

MSDE, DSE/EIS recommends the continuation of direct work with Maryland providers to meet the increasing needs of this population.

MSDE supports cross-agency collaboration to ensure the development of community-based and residential programs to meet the needs of students typically placed out-of-State and to facilitate the return of these students to Maryland programs and schools.

Table 131

Maryland School for the Blind and Maryland School for the Deaf

The Maryland School for the Deaf (MSD)

MSD is established under §8-304 of the Education Article of the Annotated Code of Maryland. MSDE is required to admit free of charge all students who are Maryland residents and meet the established admissions criteria. Section §8-305 requires each Local School System (LSS) to notify parents or guardians of each hearing-impaired child of the availability of the educational programs offered by MSD. Funding for MSD is established under §8-310.3. MSD is also required to establish and operate a program of enhanced services for deaf students who have moderate to severe disabilities under §8-310.1 with funding provided jointly by the State and the local jurisdiction. The majority of students enrolled at MSD are placed by parents or guardians rather than by a LSS. Children receiving enhanced services are placed by LSSs through the Individualized Education Program (IEP) team process. A small number of students, placed by the IEP team process, live on campus during the school week.

Maryland School for the Deaf Total Costs				
	Total Residential Served	Residential Cost	Educational Cost	Total Cost
FY2010	125	\$2,296,579	\$5,893,239	\$8,189,818
FY2011	111	\$2,253,601	\$5,031,852	\$7,285,453
FY2012	123	\$2,476,233	\$6,162,792	\$8,639,025
FY2013	125	\$2,415,309	\$5,704,625	\$8,119,934
FY2014	125	\$2,456,214	\$5,877,375	\$8,333,589

Table 132

The Maryland School for the Blind (MSB)

MSB is established to provide services for children placed by LSSs through the IEP team process. In accordance with §8-307.1 each LSS in the State shall notify the parents or guardians of each blind or visually-impaired child, including children with multiple disabilities, of the availability of the educational programs and administrative policies of the schools under their jurisdiction. MSB is required to establish and operate a program of enhanced services¹² for students who are blind and have other disabilities. Funding for these services is provided jointly by the State and local jurisdiction. The budget for MSB is submitted annually by the Governor to the General Assembly. The residential program offers a continuum of service options. Students may participate in the program on an extended-day, part-time or full-time, and may reside in a dormitory or in a house on the campus during the school week.

Maryland School for the Blind Total Costs				
	Total Residential Served	Residential Cost	Educational Cost	Total Cost
FY2010	86	\$4,760,670	\$7,628,494	\$12,389,164
FY2011	93	\$4,844,775	\$8,702,304	\$13,547,079
FY2012	89	\$4,722,467	\$8,316,387	\$13,038,854
FY2013	91	\$5,043,578	\$9,632,009	\$14,675,587
FY2014	93	\$5,238,222	\$9,521,222	\$14,760,114

Table 132

¹² Enhanced services allow students to receive educational services in Maryland rather than out-of-State residential programs.

Family Preservation Services

DHR provides family preservation services to children and family at risk of child maltreatment and/or out of home placement. Rooted in the 1980 federal child welfare law to make “reasonable efforts to prevent out-of-home placement,” Maryland has provided in-home interventions since the early 1980s. These services are provided by the Local Departments of Social Services (LDSSs) as In-Home or Family Preservation services.

From 1990 to the present, Interagency Family Preservation Services (IFPS) was added in Maryland as an inter-agency approach to preserving families with children at imminent risk of placement from all child-serving Agencies. Until FY2008 IFPS was administered by the Governor’s Office for Children (GOC), after which it was integrated into DHR’s In-Home services.

Family preservation/In-Home services can be evaluated by examining families’ risk levels, and the incidence rates of maltreatment and out of home (OOH) placement. Risk is assessed by the Maryland Family Risk Assessment (MFRA), which is administered by the caseworker at the initiation of services, several times throughout services, and at case closure. Risk data for families served in In-Home services is discussed in this Report.

Maltreatment (child abuse or neglect) is measured by the number of indicated investigation findings of child maltreatment. OOH placement is measured by the number of children entering OOH care. Both measures are analyzed here for incidents of maltreatment or OOH placement among children while they were receiving In-Home services, and for children who had recently received In-Home services.

DHR In-Home services are separated into two (2) categories:

1. Interagency Family Preservation Services (IFPS); and
2. Consolidated In-Home Services – including Services to Families with Children (a short-term service featuring an assessment of family needs) and all other In-Home services.

Data for the two separate categories (IFPS and Consolidated) will be presented, along with data for the two programs combined (Total In-Home Services).

Service Counts for DHR In-Home Services

The table below contains four years of data for Total In-Home services, Consolidated In-Home services, and IFPS. A review of the last four years’ information on overall served cases indicates there was a 13% increase in the overall number of families and a corresponding 9% increase in the number of children served in In-Home programs from FY 2011 to FY 2014.

Families and Children Served and Newly Served*						
Total In-Home						
	All Cases Served during FY			New Cases during FY		
	Cases	Children	Child/Case	Cases	Children	Child/Case
FY 2011	7,517	16,425	2.2	5,260	11,396	2.2

*FY 2011 – 2013 data revised						

Table 133

Total In-Home served and newly-served families increased significantly from FY2011 to FY2012 (12% and 24%, respectively). This was the first substantial increase among In-Home services in several years, and allayed concerns about the downward trends in In-Home services in prior years during a time period in which DHR out-of-home (OOH) placements had been decreasing significantly as well. Among some stakeholders, there had been the belief that if DHR OOH care placements were decreasing, then In-Home services should increase; this argument, however, ignored the increasing impact of DHR's Family-Centered Practice model, which emphasized child and family involvement in case planning and decisions, and utilizes natural and community resources to meet families' needs, which often negates the need for DHR/LDSS intervention.

Analysis of Indicated Findings of Child Maltreatment and Non-Placement Rates

This analysis focuses mainly on the question "Are children better off?" by measuring the absence of the occurrence of indicated findings of maltreatment, and the absence of placement in DHR out of home care.

The goal of In-Home services is to support families in caring for their children, and to remove risk of maltreatment, not the children, from their homes. Families generally want to stay together even when challenges exist, and In-Home staff strives to assist families in reaching that goal. Despite these efforts (by both families and DHR), there are instances of child maltreatment or the need for a child to be removed from the home while in (or after) In-Home services.

An indicated finding of child maltreatment refers to a decision made by a LDSS Child Protective Services (CPS) investigator, upon completion of an investigation, that there is sufficient

evidence, which has not been refuted, of child maltreatment. (There are two other CPS findings, not discussed here, including an “unsubstantiated” finding, meaning that there is not sufficient evidence to support the contention that maltreatment took place, or a “ruled out” finding, meaning that child protective services determined that maltreatment did not take place.)

OOH placements begin with a removal from the home of a child, which occurs when their safety cannot be assured in their home. The date of removal marks the beginning of the OOH placement episode.¹³ In this analysis, only DHR OOH placements are discussed—while other Maryland agencies place or fund the placement of children, this section discusses only DHR OOH placement among children who have participated in DHR’s In-Home services, as these placements are generally due only to child maltreatment. (A small number of placements exist due to children’s severe medical/mental health/developmental needs, through Voluntary Placement Agreements.)

Two measures are used to analyze the effectiveness of In-Home services in preventing child maltreatment and OOH placements:

- Did a CPS investigation result in an indicated finding for children receiving In-Home services?
- Did a DHR OOH placement occur for children receiving In-Home services?

For each of these indicators, data is analyzed for the time period during which a child received services, and then for the one-year time period after the child received services.

Measure	Timeframes	
Did a CPS investigation result in an <u>indicated finding</u> for children receiving services?	<u><i>During Services</i></u> For each fiscal year listed, the children newly-served in In-Home cases during that fiscal year are considered, and the observation time period for each child is the start of In-Home services to the first of either: <ul style="list-style-type: none"> • the In-Home service close date; or • 12 months following the start date of In-Home services. 	<u><i>Within 1 Year of Case Close</i></u> For each fiscal year listed, the children considered are those who were newly-served during the fiscal year and whose In-Home cases closed within 12 months of the start date of In-Home Services. In other words, these are the same children as the “During Services” children whose cases closed during the 12-month observation period. The observation time period for each child is the 12-month period beginning on the close date of In-Home services and ending 12 months later.
Did a DHR <u>OOH placement</u> occur for children receiving service?		

Table 134

¹³ Not all children found to be the victim of an indicated maltreatment finding are removed, nor have all removed children been the victim in an indicated maltreatment finding. Removal is based on safety issues alone; if an alleged maltreater is no longer in the home and/or an appropriate safety plan is in place, removal may not be necessary. Additionally, safety is assessed continuously, and removal decisions are made based on the current situation while findings to investigations generally take up to two months to finalize. Safety issues may require removal regardless of an investigation finding.

Table 135 displays the counts of cases (families) and children newly-served each fiscal year, along with the counts and proportions of newly-served families whose cases closed within one year. It is evident that the majority of cases close within a year of starting. The child population associated with these cases were observed a year after case closing to determine whether a CPS Indicated Investigation or DHR OOH placement occurred.

For the “During Services” observation period, it is necessary for a year to elapse after the reported fiscal year ends. For the “Within 1 Year of Case Closure” observation period, it is necessary for two years to elapse after the reported fiscal year ends. Therefore, data for events occurring within 1 year of case closure are available for children newly served in FY2012, and data for events occurring during services is available for children who entered In-Home services in FY2013.

Using this construct, this table shows the number children who began In-Home services in FYs 2009-2014, and those that started In-Home services in those years but also completed services within 12 months of their service start date. Although this table includes data on cases (*i.e.*, families), subsequent data on indicated maltreatment and OOH placement will focus on children, not cases.

Total In-Home Cases*						
Fiscal Year	Cases			Children		
	Newly Served Cases	Newly-Served & Closed Within 1 Year	% Closed Within 1 Year	Newly-Served Children	Newly-Served & Closed Within 1 Year	% Closed Within 1 Year

*FY2011 – 2012 data revised

Table 137

Indicated CPS Investigations/Child Maltreatment

During the past five fiscal years, the percentage of children who have experienced an indicated Child Protective Service investigation that resulted in an indicated finding of child maltreatment during In-Home services ranged between 2.6% in FY2012 and 2013, and 4.2% in FY2011. Despite these fluctuations, since FY2009, the average percentage of children not experiencing indicated maltreatment is 96.8%; for FY2013 the percentage was 97.4%.

Within one year of case closure, an average of 3.4% of children experienced an indicated finding of maltreatment within one year of case closure; therefore, since FY2009, an average of 96.6% of children did not experience an indicated maltreatment finding up to one year after finishing In-Home services.

During services and for the one-year period after services, therefore, approximately 97% of children did not experience an indicated finding of maltreatment over the past four to five years. For the past three fiscal years, there has been a lower rate of indicated maltreatment findings among children in IFPS compared to those in Consolidated In-Home services both during and within the year following case closure.

OOH Placement

Although there was a slight increase in FY2011 (to 5.2%), the general rate of OOH placement during In-Home services has ranged from 4.0% to 4.6%, dropping to 4.2% in FY 2013. Overall, an average of 95.5% of children served in In-Home services from FY 2009 to FY 2013 was able to remain with their families during In-Home services, and avoid OOH placement.

OOH placement in the year following In-Home services has been stable between 2.2% and 2.5% for the past four years, with the lowest rate (2.2%) this past fiscal year. For these past four years, an average of 97.7% of children remain in their home and avoided OOH placement within the first year after receiving In-Home services.

For OOH placement, a lower percentage of children in IFPS entered OOH care during services than Consolidated services – in FY2013, 3.5% of children in IFPS services entered OOH care, compared to 4.3% in Consolidated services. After care, however, there is a slightly higher rate among children who had received IFPS than Consolidated (2.9% versus 2.0%, respectively, FY 2012 rates).

Analysis of Maryland Family Risk Assessment (MFRA) for In-Home Services

DHR is in the process of revising and implementing two new risk and service assessment instruments. The Child and Adolescent Needs and Strengths- Family version (CANS-F) was developed, which provides specific caregiver information and is intended to support strengths-based case plans for in-home services. Additionally, a revised Maryland Family Risk Assessment (MFRA) has been designed based on an actuarial model, which will provide increased inter-rater reliability. It is anticipated that these instruments will be implemented in June 2015. Once these instruments are fully implemented, DHR will have a better set of integrated tools for its In-Home workforce to use, and will gain a well-rounded picture of a family's safety, risk, and functioning that will assist with service planning and data reporting.

Data presented here is based on the current MFRA, which offers the advantage of consistency in analyzing data from prior years, and consistency within cases. Workers are trained on the MFRA during pre-service orientation and through ongoing supervision.

DHR In-Home workers are required to complete an MFRA while the family is receiving services. An intake and closing risk assessment is required, as well as additional ratings every six months or when the family situation changes. The assessment is six pages and includes a central section wherein workers score family observations in five risk categories: (a) History of Child Maltreatment; (b) Type and Extent of Current Child Maltreatment Investigation; (c) Child Characteristics; (d) Caregiver Characteristics; and (e) Familial, Social and Economic Characteristics. A four-level risk rating of no-risk, low-risk, moderate-risk, or high-risk is assigned by assessing past incidents or the current incident leading to In-Home services. The final section of the MFRA is the Overall Rating of Risk. Workers enter their summary risk ratings for the five preceding risk categories before assigning an overall rating of risk for the family. Workers use the overall family risk rating to inform their case management decisions including case opening.

MFRA Intake Ratings

Within two weeks of starting an In-Home service case, workers are required to complete a MFRA rating for the family. Data, however, is not available for an average of 18% of In-Home cases for FY2011 - 2014. Two reasons seem most likely for this missing data: first, the MFRA may be completed during the investigation and then shared with the In-Home services team but not made a formal part of the In-Home service record; second, workers may be completing the MFRA in a paper-version but not recording the results in MD CHESSIE. DHR is working on

correcting these issues through a quality assurance system, as well as through improved supervision of case workers.

Safety, not risk, is the decisive factor in determining if children must be removed from their family of origin and placed into OOH care. (Safety is measured in a separate instrument, the SAFE-C.) Although safety and risk are different constructs (safety is concerned with the child's immediate condition), many cases with high risk also have enough immediate safety issues to warrant an out of home removal. Therefore, families with the highest risk may be more often served in OOH services than In-Home services.

Initial Risk based on MFRA Ratings*							
Total In-Home Services							
Fiscal Year	n	Percent					
		None	Low	Moderate	High	Missing	
FY 2011	7,517	9%	28%	39%	10%	14%

*FY 2011 – 2013 data revised

Table 138

This table shows initial MFRA ratings. In both Consolidated In-Home Services and IFPS cases over the past four years, the largest proportion of families has moderate risk levels. Families with low risk are the next largest group. Among Consolidated In-Home cases, those with no risk represented a higher proportion of cases than those with high risk in FYs 2012 and 2013, while the reverse is true for IFPS. Overall, over a third of all families in FY2014 (34%) had moderate or high risk at the initial MFRA evaluation.

Family Preservation Summary

DHR In-Home services are a critical component of meeting the needs of thousands of vulnerable children and their families. In FY2014 approximately 17,800 children from 8,500 families received DHR In-Home services.

Among those who had an initial MFRA (risk assessment) in FY2014:

- 34% had moderate to high risk at the initial assessment

Among those served in In-Home services, based on FY2013 entries (most recent year for which data is available):

- 97% of children did not experience an indicated finding for maltreatment during services, and
- 96% remained with their families and were not removed into a DHR OOH placement during services.

Among those children whose In-Home services ended, based on FY2012 entries (the most recent year for which data is available):

- 97% of children did not experience an indicated finding for maltreatment within one year of case closure, and
- 96% remain with their families and were not removed into a DHR OOH placement within one year of case closure.

As of August 31, 2014, there were 5,225 children in DHR OOH care (DHR/SSA State Stat Place Matters file, August 2014 data); this is the lowest number of children requiring removal from their homes in over 25 years. The provision of DHR In-Home services and other community supports are crucial in keeping children in their homes and families.

DHR's Place Matters Initiative has been able to achieve this success for children and families through its Family-Centered Practice model and use of Family Involvement Meetings. Child, youth, and family involvement are essential in DHR's OOH and In-Home practice models, which also rely on community supports and services. Providing In-Home services and other supports to families is necessary to continue to keep children with their families and to strengthen families' abilities to care for their children.
